

List of third countries which impose restrictions to EU products concerning Schmallenberg virus (SBV)

Algeria (restriction on live ruminants from some affected countries);
Argentina (new import conditions for bovine and bull semen and embryos);
Australia (additional certification requirements for semen and embryos of ruminants);
Belarus (the same of the Customs Union countries);
Bosnia and Herzegovina (additional requirements for live ruminants and semen from affected countries);
Brazil (lifting the restriction on ruminant genetic material but remaining restriction on imports of live animals);
Chile (lifting the restriction);
China (restrictions on bovine and ovine embryo and semen collected after 01.06.2011 from affected EU MSs);
Canada (restrictions on embryos and semen from bovine, ovine, caprine, bison and buffalo collected after the 1st June 2011);
Egypt (lifting the restriction on animal products but remaining the restriction on imports of live animals and semen);
Equator (restriction on live animals and genetic material of cattle, sheep, goats and bison from affected EU MSs);
Japan (requirements for the import of bovine semen and embryos);
Jordan (restrictions on live ruminants);
Kazakhstan (restrictions on live ruminants, meat and genetic materials);
Kuwait (restriction on bovine embryos and live cattle);
Lebanon (restrictions on live cattle and small ruminants from some affected countries);
Mexico (lifting restriction on ruminant genetic material from affected countries);
Morocco (restrictions on bovine semen, live cattle and ruminants semen);
Oman (restrictions on semen and embryos of ruminants);
Peru (restrictions on genetic material collected after 1st June 2011 from affected MSs);
Russian Federation (restrictions on live ruminants (cattle, sheep and goats), their semen and embryos, and pigs except for breeding animals – linked not only to Schmallenberg but also to non-compliances in exports from the EU to the RF in 2011, RF request for EU actions to prevent mortality of pigs during transportation, and RF claims on individuals MSs);
South Korea (restrictions on bovine semen from affected MSs);
Turkey (restrictions on cattle for breeding and fattening);
Ukraine (lifting the restriction on live ruminants but remains the restriction on genetic materials);
United Arab Emirates (restrictions on cattle and small ruminants);
Uruguay (restrictions on genetic material of susceptible species from affected countries collected after 1 May 2011);
USA (restrictions on imports of bovine semen and embryos collected after 1 June 2011 from all EU countries. Will also implement restrictions on future shipments of sheep and goat semen).
